

Quality and Compliance Specialist

Join a dynamic, fast-growing company with a sustainable and disruptive technology in the biotech sector, where you can make a positive impact on the environment and society.

Are you a passionate and collaborative QA and Compliance Professional with experience from the pharma or food industry?

You may be the perfect fit for the role of Quality and Compliance Specialist at SANI Membranes.

As QA and Compliance Specialist at SANI Membranes, you will have an important role in the continued growth and international introduction of our unique Vibro® Technology.

Our innovative approach to membrane filtration is revolutionizing bioprocessing and pharmaceutical industries, and we are proud to contribute to a more sustainable future through our products that are built using recyclable materials and drastically reduces the energy consumption of our customers across their upstream and downstream processes.

Key responsibilities

As Quality and Compliance Specialist, your daily tasks will be diverse, but primarily within:

- Maintaining and developing our current Quality Management System (QMS)
- Ensuring ongoing compliance with the QMS
- Driving internal activities to ensure compliance with regulatory requirements, such as the EU Machinery Directive and Pharma GMP
- Planning and executing internal audits as well as supplier audits
- Leading customer audits and supporting customers with regards to compliance, quality topics and product quality documentation
- Contributing to new business initiatives and projects and reviewing and communicating the impact on Quality Management Systems (QMS)

You will have the opportunity of working closely with the production and product management and will be thoroughly introduced to our technology and our products.

The position includes 10-20 travel days annually.

Use your experience from the pharma or food industry

You have a relevant educational background and some years of experience working with quality and compliance topics within the food or pharma industry. We value experience from a similar role above formal educational qualifications. Experience with equipment qualification and validation will be an advantage.

You are fluent in Danish and you speak and write English at a high level. You are an outgoing person, structured in your work and you thrive in the dynamics of a growing company.

A growing team of visionary professionals

The Vibro® technology is an innovative approach to membrane filtration servicing a growing number of industries. Our technology enables our customers to achieve substantial improvements in yield, quality and process control, and is directly scalable all the way from small laboratory units to large production units, making it ideal for process development

At SANI Membranes, we value openness and inclusion, and we are committed to creating a friendly and informal work environment characterized by a flat organizational structure. Additionally, you are offered plenty of responsibility and opportunities to advance and develop, personally and professionally.

Join us on an exciting journey to change the way micro- and ultrafiltration is accomplished across upstream and downstream processes.

We are looking forward to hearing from you
