

Student Assistant (Graphic Design / Animation)

Have you reached the place in your studies where you dream of getting challenged professionally with interesting tasks that match your qualifications and your education – and are you interested in being part of a fast-growing company in the biotech-pharma industry?

Then you might be the Student Assistant SANI Membranes is looking for.

About SANI Membranes A/S

We are a small company experiencing rapid growth. Our unique technology is used for membrane filtration throughout the world in many different industries, including food, biotech, pharma and water filtration.

The organization is characterized by a flat hierarchical structure where everyone's ideas are heard.

We are looking for a Student Assistant with knowledge of 3D animation who wants to try their hand in a dynamic and innovative environment.

The position

As part of SANI Membranes, your main task will be visualization of the company's technology, on its own, and in relation to target applications. In addition, you will become familiar with different disciplines in digital marketing.

The position is estimated to 10 hours per week.

Who are you?

- You are studying within the fields of graphic design, motion graphics, animation, marketing, or similar.
- You have knowledge of 3D animation software, e.g. Blender or Houdini
- You have strong communication skills
- You are creative and eager to learn
